

PathXchange™

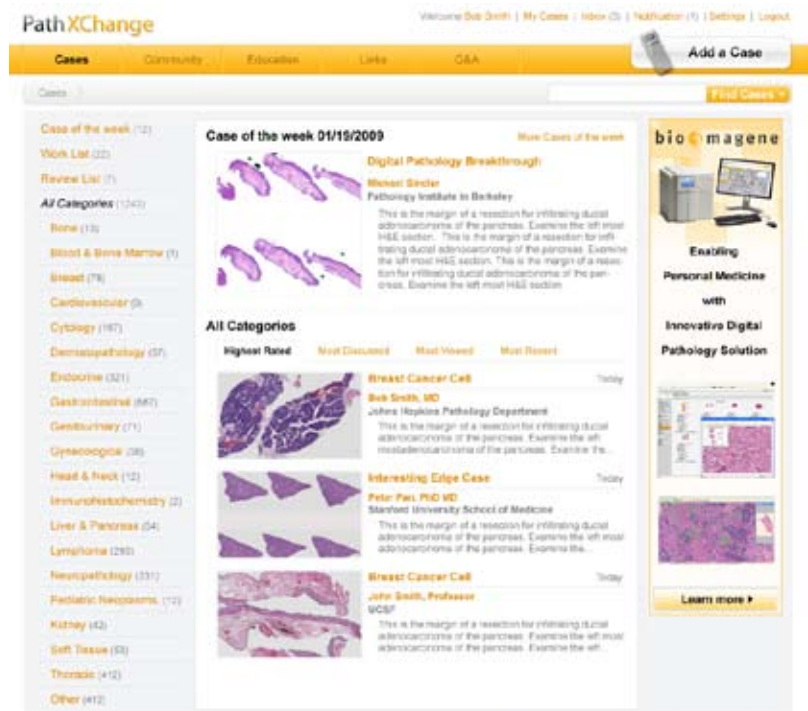

Global Online Pathology Community

PathXchange.org (Px) is a not-for-profit professional networking portal for the global pathology community, promoting digital pathology. Px brings the field of pathology into the digital age with Web 2.0 features designed to promote exchange of pathological cases, ideas, knowledge, information, products, and services. Cases and information can originate from anywhere, from any platform (vendor neutral), and shared with the sub-groups of your choice.

Business Need:

Pathology practices are geographically fragmented and are typically small, employing an average of 1-2 pathologists at each location working in isolation. There is an increasing need for pathologists to stay connected with the professional network and keep up-to-date with the latest advances in the field.

Px combines the elements of case gallery (e.g., MyPacs), community content contribution (e.g., YouTube), and professional networking (e.g., Facebook, LinkedIn) to provide a friendly online home-place for pathologist to stay connected with their professional network, keep their professional knowledge current, and contribute to the cause of furthering the advances of the global pathology community.

Px Features:

Professional Networking

- Connect and stay in-touch with members of the global pathology community
- Build your own network and follow their cases and slides
- Stay informed on new developments through community feeds and PathAlerts™

Tele-Pathology

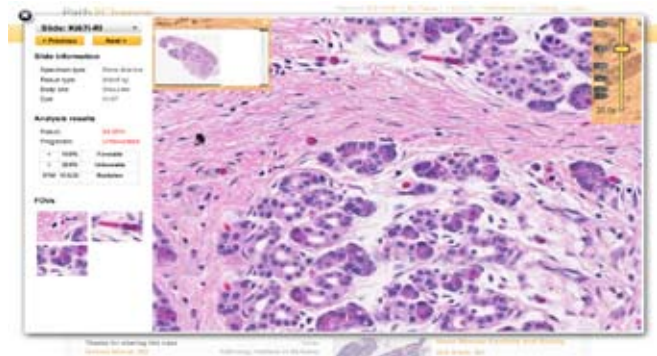

- Collaborate on cases; view slides together in synchronized mode
- Easily seek and give expert opinion on cases and slides
- Facilitate formal second opinion through network of specialists

e-Learning

- Browse cases, reference material, and community contributed information
- Find similar cases for reference and education
- A case review committee regularly publishes interesting cases
- Tutorials and course material

Digital Case Sharing and Archival

- Share cases online – save cost and headache inconveniences associated with shipping slides
- Browse gallery of cases shared by members of the community; search for cases
- Create your own case library; archive all of your slide images
- Reference each case and slide with a permanent URL for websites, papers, and journals.

Access Anywhere

- 24 x 7 instant access to interesting cases from around the world
- No installation necessary
